Portable Machining Tools

Manual Facer

- **Manual tool for re-facing flanges**
- **Lightweight simple to operate**
- **Portable and power-free operation**
- **Adjustable for multiple flange sizes**
- **Speeds up flange repairs saving costs**

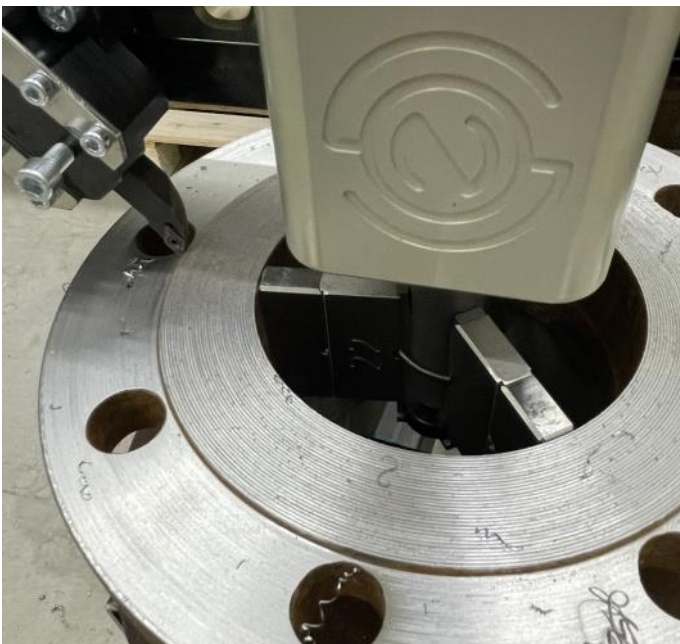

Normaco Manual Flange Facer

A lightweight, hand-operated tool for reconditioning raised-face and flat-faced flanges—ideal for quick, on-site flange repairs where power isn't available. Weighing just 6kg, it's easy to carry and simple to use, even in tight or remote locations.

Designed for pipe, valve, and tank flange resurfacing, it handles a wide range of sizes with one tool, making it a cost-effective option for technicians in the field. Machines flanges up to 14" / DN350 (Class 1500 / PN10)

The tool is well-suited for flange maintenance across a range of industries, including oil and gas, marine, fabrication, petrochemical, and power generation. It's commonly used for pipeline and pressure vessel repair or manufacturing, as well as for resurfacing flanges on valves and heat exchangers.

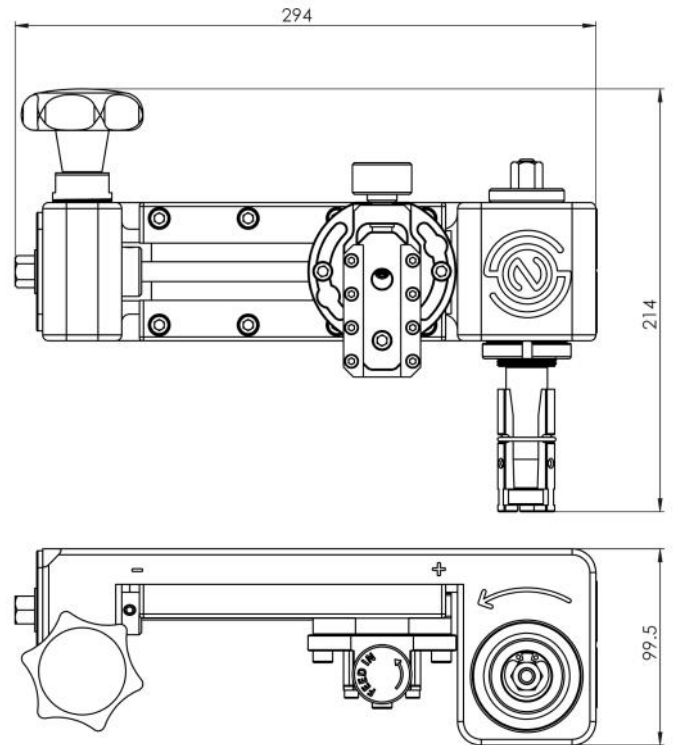

The Normaco Manual Facer is a practical solution for flange maintenance across industries where reliability and clean sealing surfaces matter.

Manual Facer

Technical Data:

Operational Weight	6 kg (13 lbs)
Shipping Weight	12 kg (26.5 lbs)
Clamping Range	Min 24.5 mm (0.96") Max 382 mm (15.04")
Machinable Area	Min D25.5 mm (1.00") Max D450 mm (16.53")
Toolholder Travel	80 mm (3.15")
Finish	Phonographic Smooth (optional)

Kit includes

- Manual Facer
- Carry case
- Hand tools (Hex keys, wrench, punch)
- Clamping jaw set
- Feed set for phonographic
- Set of cutting tools
- Pack of inserts
- Indicator
- Operator manual
